A great many professional men allow only Alboden Dental Cream to be used in their homes. Dr. Henry R. Kreider, professor of chemistry at Toledo University, considers it a superior preparation, and the children of the Rochester Orphan Asylum have their "tooth drills" with it.

Alboden is calcium carbonate, saponified and mixed with the well-known ells of cloves, cinnamon and eucalyptus. It is peculiarly effective and safe for women and children. A tube lasting five weeks can be bought, guaranteed, at any drug store.
